

Memorandum

To : Bob Reid
Sacramento

Date : August 24, 1984

Subject: UIC Zone Exemption

From : Department of Conservation—
Division of Oil and Gas

Place: Bakersfield

In accordance with our order of April 4, 1983, operators injecting into the Olcese zone in the Main & Baker-Grover areas of Mount Poso field have until September 14, 1984, to discontinue. Macpherson Oil Company had subsequently filed a zone exemption request through us to the Environmental Protection Agency.

The status of this zone exemption application is requested. If this application has not been addressed by the EPA, would it be appropriate for the Division to grant an extension?

Hal Bopp

Hal Bopp
Senior Oil & Gas Engineer

An exemption will be granted until a closer look can be made by DCG and EPA into those reservoirs that were not originally included in the original exemptions but subsequently included per our work with EPA.

Notified Hal Bopp on 9/12/84 that EPA will be conducting a study on the exempted aquifers listed on attachment 2
